EZ-Boom

A simple effective way to lift trusses, trees or whatever.

Features:

3 x 3 Steel extruded post with gusseting welded along base and 5/8" holes set at 12" intervals allow you to mount a hook in the most effective location.

1200 lb. lifting capacity.

May be easily removed from the back plate while the back plate is being reused on many other EZ attachments.

Universal skid steer back plate included.
