

## EZ-Backhoe - EH-5000 - Pin on Thumb and Grapple now Available.

### Features:

- Our fixed backhoe uses your current skid steer controls for digging along with a 12" stroke x 3" Diameter hydraulic cylinder makes for superior ripping and tearing performance.
- Utilizes your skid steer action for side to side motion which simplifies your digging experience and does not require outriggers..
- Compact enough to carry in the bed of a pick-up truck. You will never be stuck without a backhoe at a job site again.
- Runs directly from your auxiliary hydraulic connections.
- Main pin is a stout 1 1/2", while the cylinder pins are 1" hardened, polished 4140 pin material.
- Greaseable fittings on all pivot points for longer life.
- All of our parts are CAD/CAM manufactured, plasma cut, and formed in a highly automated shop which leads to a superior built product.
- 6 foot digging depth (6.5' reach). 3000 lb. lifting capacity.
- Available with a 8" Trenching Bucket or a 12", 16" & 22" digging buckets. Optional grapple thumb attachment and clean out attachments are also available. (Grapple Thumbs may be used on 8", 12" & 16" buckets). A 32" Clean-out bucket is now available.
- Grapple Head now Available.
- Uses existing skid steer controls and auxiliary hydraulics.
- Ideal for machines with a lifting capacity of 1300# and up (35HP or above recommended). **Pressure compensation now provided on all models allowing this backhoe to be run on machines with pressures from 1500 - 4300 PSI.**
- Recommended for machines equipped with auxiliary hydraulics rated @ 8 GPM to 40 GPM flow with 1500psi - 4300psi pressure rating.
- Universal Skid Steer Quick-Tach mounting bracket will fit most Skid Steer brands.
- Replaceable teeth mounted to drop forged shanks ensure a strong bite when digging.
- Unit ships completely assembled, greased and ready to go except for hydraulic couplers to mate to your machine.
- Weight - 350 - 450 lbs. depending on configuration.
